

Project Design Phase-II Data Flow Diagram & User Stories

Date	05 July 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
EV Data Specialist	Data Acquisition	USN1	Collect EV Charging Sessions Dataset	Charging session data is successfully collected from all required sources.	High	Sprint 1
EV Data Specialist	Data Acquisition	USN2	Import Charging Data into Tool	Dataset is imported into the visualization tool without errors.	High	Sprint 1
EV Data Engineer	Data Preparation & Validation	USN3	Handle Missing and Invalid Values	Missing and invalid values are identified and treated correctly.	High	Sprint 1
EV Data Engineer	Data Preparation & Validation	USN4	Create Calculated Fields (Range, kWh/100km, Cost per km, Charge Duration)	Calculated fields are created accurately for all records.	High	Sprint 1
EV Data Engineer	Data Quality Management	USN5	Clean and Standardize EV Data	Duplicate, inconsistent, and outlier records are removed or standardized.	High	Sprint 1
Analytics User	Geospatial Visualization	USN6	Visualize Charge Distribution by Location	Map correctly displays charging stations and session counts by location.	Medium	Sprint 2
Analytics User	Statistical Visualization	USN7	Visualize Charge Power Distribution	Histogram/Bar chart shows correct distribution of charge power (kW) usage.	Medium	Sprint 2
Analytics User	Relationship Visualization	USN8	Visualize Range vs Battery Capacity	Scatter plot accurately shows relationship between range and battery capacity.	Medium	Sprint 2
Analytics User	Time Series Visualization	USN9	Visualize Charging Trend Over Time	Line chart accurately displays charging sessions over time (daily/weekly/monthly).	Medium	Sprint 2
Business Analyst	Dashboard Development	USN10	Develop EV Charge & Range Dashboard	Interactive dashboard with filters, KPIs, and visualizations is completed successfully.	High	Sprint 2
Business Analyst	Insights & Reporting	USN11	Create EV Insights Story	Story presents actionable insights on charge behavior, range performance, and infrastructure utilization.	High	Sprint 2
